Summary

Results-driven Back-End Developer with hands-on experience in designing, developing, and deploying scalable enterprise applications using ASP.NET Core and .NET technologies. Strong foundation in Clean Architecture, SOLID principles, and API development with proven success in performance optimization, database management, and secure authentication systems. Demonstrated ability to deliver robust, maintainable, and high-performance solutions in corporate, freelance, and startup environments.

Skills

Backend: C#, OOP, ASP.NET Core, .NET MVC, .NET Web API, .NET Framework, SignalR

Databases and ORM: SQL Server, LINQ, Entity Framework, EF Core, Dapper, Redis

Core Concepts: JWT Authentication & Token Lifecycle, Problem Solving, Data Structures, Algorithms, SOLID, Design Patterns, Clean Architecture, Asynchronous Programming, Performance Optimization, Scalability

Cloud & Monitoring: Azure, AWS, Docker, GitHub Actions, CI/CD, Application Monitoring, Logging (Serilog, NLog)

Frontend Technologies: HTML5, CSS3, Bootstrap, JavaScript

Testing & API Tools: Unit Testing, Integration Testing, xUnit, NUnit, Moq, FluentAssertions, Postman, Swagger

Soft Skills: Teamwork, Research, Time Management, Communication Skills

Work Experience

Freelance .NET Developer

5-2025 – Present

- Designed and delivered SaifLine — a production ERP Financial System with RESTful APIs, role-based authorization, performance optimization via stored procedures (35% query time), and Hangfire background jobs; delivered on time for a paying client.

Backend Developer | Poktco, Remote

11-2025 – 5-2026 | Saudi Arabia

- Developed and maintained a full-featured e-commerce API using ASP.NET Core Web API and Clean Architecture
- Implemented product management, order processing, user authentication, and coupon systems with EF Core and SQL
- Built Excel import/export features, sales analytics, top-selling products tracking, and low-stock alerts
- Integrated multiple payment gateways and applied caching strategies with Redis for improved performance
- Implemented JWT authentication with refresh tokens and role-based authorization for different user roles
- Optimized database queries and API endpoints, improving response time by 40%
- Applied SOLID principles and design patterns to ensure maintainable and scalable code

.NET Developer, ELC

8-2024 – 11-2025

- Optimized LINQ queries via stored procedures and Redis caching — improving API response time by 20% and reducing server downtime by 15% through CI/CD pipelines for automated testing and deployment.
- Authored xUnit tests covering core business logic, reducing post-deployment bugs; containerized dev environments with Docker; managed code via Git/GitHub with branching .
- Applied secure coding practices and API protection techniques including JWT-based auth, role-based authorization, and data validation; mentored junior developers during onboarding and code reviews.

Projects

HRMS – HR management system (Freelance) ([Link](#))

02-2026 – 06-2026

- Developed a comprehensive HR management system for companies to manage all employee-related operations including employee profiles, attendance and fingerprint-based check-in/out, fixed and shift-based schedules, payroll-related operations such as bonuses, deductions, rewards, and penalties, along with leaves management, hiring workflows, and employee requests. The system also includes a dedicated employee portal to allow employees to view their personal data, attendance records, company policies, and all HR-related information, in addition to a full reporting system for HR departments and managers to monitor workforce performance and organizational data.

REG – Real Estate Platform (Freelance) ([Link](#))

10-2025 – 02-2026

- Developed a scalable real estate management system with property listing, search, and administration features, implementing Clean Architecture, EF Core, SQL Server, and secure JWT-based authentication with role-based authorization.

Poktco ASP.NET Core Web API ([Link](#))

11-2025 – 5-2026

- Developed a full e-commerce API with product, categories, brands, order, user, and coupon management. Enabled Excel import/export, sales analytics, top-selling/low-stock tracking, and multi-payment support.

Education

B.Sc., Computer Science and Artificial Intelligence — Benha University

Graduated: 6-2024

Certifications & Training

Full-Stack .NET Core Certification — ITI, Banha

7-2024 – 8-2024

ASP.NET Core & SQL Server Diploma — Route Academy

11-2023 – 7-2024
